# ABOUT US

ATC GLOBAL LTD was first established offline since 2011, but has officially settled as an online business since 2020 to serve the needs of millions of investors worldwide.

The idea behind Atcglobal is straightforward: to allow the average person to cash in on the cryptocurrency boom, which is still the most lucrative investment of the 21st century, despite what most people think. Apart from Bitcoin, there are thousands of other cryptocurrencies being traded for huge profits on a daily basis.

Some of these cryptocurrencies include Ripple, Ethereum, Monero, and Zcash etc, which are still making returns of over 10,000% and higher for ordinary people around the world. ATC Global allows you profit from all these cryptocurrencies, even in a bear market. It uses artificial intelligence (AI) to automatically handle long and short-term selling for you. So you can make money around the clock, even while you sleep.
